WORK EXPERIENCE

Beamer Labs – Charlotte, NC

Feb 2024 - Jan 2025

Software Engineer

- Developed and maintained web applications using JavaScript, HTML/CSS, and Bootstrap, ensuring cross-browser compatibility and responsive design
- Collaborated with backend engineers to integrate RESTful APIs, improving data flow efficiency
- Debugged and optimized front-end performance, which resulted in improved page loading speed
- Participated in Agile sprints, contributing to UI/UX improvements based on stakeholder feedback

C-Trax – Charlotte, NC

May 2023 - Mar 2024

Front-end Web Developer

- Built and shipped user interfaces using Vue 3, Quasar, and TypeScript, enhancing usability for the application's users
- Utilized Vue DevTools & GitLab pipelines to address and rectify front-end issues, improving app stability
- Contributed to the integration of new features with senior developers, implementing API calls for real-time data updates using CRUD methods to boost user engagement

PROJECTS

Business Plan Builder Sept 2024 - Nov 2024

- Designed and implemented the user interface for an AI-powered chatbot that generated personalized business plans based on user input.
- Partnered with cross-functional teams to compile requirements, delineate project scope, & establish design guidelines using
- Leveraged front-end technologies like HTML, CSS, and JavaScript to craft engaging and dynamic UI components
- Conducted usability testing and incorporated user feedback to improve the design and enhance user satisfaction iteratively.

The Boardroom Sept 2024 - Nov 2024

- Developed responsive and interactive user interfaces for AI-powered chatbots using HTML, CSS, and JavaScript.
- Integrated three specialized chatbots, each with unique roles and responses, to enhance user interaction and support various user needs
- Collaborated with the backend team via Slack to ensure seamless communication between the UI and chatbot logic
- Conducted user testing to refine chatbot interactions, leading to improved overall user satisfaction
